Characteristics. Descriptions of ball lightning vary widely. It has been described as moving up and down, sideways or in unpredictable trajectories, hovering and moving with or against the wind; attracted to, unaffected by, or repelled from buildings, people, cars and other objects. Some accounts describe it as moving through solid masses of wood or metal without effect, while others describe ...

Ball lightning may be an atmospheric electrical phenomenon, the physical nature of which is still controversial. The term refers to reports of luminous, usually spherical objects which vary from pea-sized to several meters in diameter. It is sometimes associated with thunderstorms, but unlike lightning flashes, which last only a fraction of a ...

Critical collapse of a massless scalar field in spherical symmetry is systematically studied. We combine numerical simulations and asymptotic analysis, and synthesize critical collapse, spacetime singularities, and complex science. First set of approximate analytic expressions near the center are obtained. We observe that, near the center, the spacetime is nearly conformally flat, the dynamics ...

The ball lightning left two holes in the plane. A "ball of sparks" about the size of a basketball entered a commercial aircraft, apparently through an engine air intake, moved into the fuselage, and proceeded to chase a flight attendant up and down the aisle. She was screaming as she tried to outrun the ball lightning.

Ball Lightning is the 4th upgrade of the 1st path for the Druid, costing \$5,100 on Easy, \$6,000 on Medium, \$6,480 on Hard and \$7,200 on Impoppable. It makes the Druid shoot slow-moving electric balls that make additional lightning bolts. The Ball is shot every 6 seconds and the lightning from Ball Lightning spawns every 0.35 seconds dealing 2 damage to up to 30 bloons per lightning.
