denominator have a common factor. For example, if $\frac{7}{4}$ were...

3 Ways to Multiply Fractions - wikiHow

Step 1. Multiply the top numbers: $1 \frac{2}{5} \times 2 \frac{5}{10} = 1 \times 2 = 2$ Step 2.

Multiply the bottom numbers: $1 \frac{2}{5} \times 2 \frac{5}{10} = 1 \times 2 \frac{2}{5} \times 5 = 2 \frac{10}{10}$

Step 3. Simplify the fraction:

Multiplying Fractions - MATH

The paper folding along with the connection to the number line helps students visualize that when you divide a fraction in half, it is the same as multiplying $\frac{1}{2}$ by $\frac{5}{6}$. The same thinking corresponds to folding the strip once again in half.

Folding Strips of Paper - Illustrative Mathematics

The purpose for this is three-fold. First, multiplying fractions by whole numbers is an important foundational piece of multiplying fractions. Second, connecting students with their prior learning

Get Free Multiplying Fractions Paper Folding

experience allows for them to connect these pieces. I want to help the students make connections between concepts rather than learn each in isolation.

Fifth grade Lesson Multiplying Fractions by Whole Numbers ...

12 May - Multiplying a fraction by a fraction. Learn. $\frac{1}{3} \times \frac{1}{2}$ also means one third of one half. This can be shown by folding a piece of paper.

Home Learning with BBC Bitesize - KS2 Primary Maths for ...

A whole lesson I've created for multiplying fractions. It starts with some skill practice they've learned in recent previous lessons - eg. Equivalent fractions, converting mixed to improper fractions and adding fractions. There are differentiated questions - in the format of Nando's style - Lemon & Herb, Medium, Hot,
