evolves. From first atom to molecule,
mineral to magma, granite crust to
single cell to verdant living landscape,
ours is a planet constantly in flux.

The Story of Earth: The First 4.5 Billion Years, from ...

Earth First! is a radical environmental
advocacy group that emerged in the
Southwestern United States in 1979. It
was founded on April 4, 1980, by Dave
Foreman, Mike Roselle, Howie Wolke,
Bart Koehler, and Ron Kezar.

Earth First! - Wikipedia

Earth First! was formed in 1980 as an
alternative to mainstream
environmental organizations such as the
Sierra Club and the Wilderness Society.
Those groups were seen as too
moderate and too willing to sacrifice the
protection of some wild areas in order to
make deals with politicians.

The Story of Earth: The First 4.5 Billion Years, from ...

The earliest undisputed evidence of life on Earth dates at least from 3.5 billion years ago, during the Eoarchean Era, after a geological crust started to solidify following the earlier molten Hadean Eon.

History of Earth - Wikipedia

Storyline Born from dying stars, it was sculpted by violent collisions in space. Yet, in an epic journey, this hostile ball of molten rock transformed itself into a nurturing environment. From it emerged forms of life, none of which have been found anywhere else in the universe.

The Story of Earth (2018) - IMDb

The times were a-changin', and an unlikely confluence of people and events led to the first Earth Day celebration on April 22, 1970. But the seed of Earth Day was planted many years earlier when a handful of scientists and conservationists became aware that the phenomenal post-war growth of

A Brief History of Earth: How it All Began

It makes sense the first signs of life on planet earth are incredibly simple. The earliest fossil evidence of life on earth dates to 3.7 billion years ago. They were found preserved in ancient rock samples from Greenland. The fossils were once part of a now-extinct seabed and thought to be the remains of ancient microbes.
